

INTEROFFICE CORRESPONDENCE
Los Angeles Unified School District
Office of Environmental Health and Safety

TO: Local District Superintendents
Local Districts

DATE: April 29, 2021

FROM: Carlos A. Torres, Director
Office of Environmental Health and Safety

SUBJECT: AIR QUALITY ADVISORY FOR APRIL 30, 2021

The South Coast Air Quality Management District (SCAQMD) has forecast air quality levels to be “unhealthy for sensitive groups” for communities located within the West San Fernando Valley. Children and adults, and people with lung disease, such as asthma, should avoid prolonged or heavy exertion outdoors. Refer to the second page for a map of schools that fall within this designated area.

The Office of Environmental Health and Safety (OEHS) will continue to monitor air quality conditions and provide updates as necessary. Please share this information as needed. Additional information may be found in each school’s Integrated Safe School Plan. Should you have any questions or need assistance, do not hesitate to contact our office at (213) 241-3199.
