

Los Angeles Unified School District

Office of Environmental Health and Safety

AUSTIN BEUTNER
Superintendent of Schools

CARLOS A. TORRES
Director, Environmental Health and Safety

JENNIFER FLORES
Deputy Director, Environmental Health and Safety

NOTICE OF EXEMPTION

To: County Clerk and Registrar-Recorder
County of Los Angeles
12400 Imperial Highway
Norwalk, CA 90650

From: LAUSD OEHS
333 South Beaudry Avenue
21st Floor
Los Angeles, CA 90017

Project Title:

La Salle Elementary School Marquee Project

Project Location – Specific:

The La Salle Elementary School Marquee Project (Project) will occur on the 5.58-acre La Salle Elementary School Campus (Campus). The Campus is located at 8715 La Salle Avenue in the City of Los Angeles. The Campus is situated in an urban area and is surrounded by single-family residential homes.

Project Location – City:

Los Angeles

Project Location – County:

Los Angeles

Description of Nature, Purpose, and Beneficiaries of Project:

The Project will install a new free-standing electronic marquee in the front of the school. The cabinet of the marquee will be 4 feet in height and 8 feet wide and mounted on a pedestal that is 3 feet 6 inches in height and 2 feet 8 inches wide. The Project will also provide a new concrete footing and electricity for the marquee. The Project will not result in an increase in the student enrollment or require an alteration of the current use, function, or capacity of the existing facilities or Campus.

The Project will be implemented pursuant to all applicable State, federal, and local regulations and all applicable LAUSD specifications, standards, and/or guidelines, including those in compliance with the California Environmental Quality Act (CEQA) and the updated Standard Conditions of Approval for District Construction, Upgrade, and Improvements Projects (SCs) as adopted by the Board of Education in February 2019.¹ LAUSD's standard conditions, design guidelines, and best management practices are designed to be incorporated into the Project design in order to avoid or limit potential adverse impacts associated with the District's projects.

¹ LAUSD OEHS, "Standard Conditions of Approval for District Construction, Upgrade, and Improvements Projects," Adopted by the Board of Education on February 5, 2019.

Doc# 738256

333 South Beaudry Avenue, 21st Floor, Los Angeles, CA 90017 • Telephone (213) 241-3199 • Fax (213) 241-6816

*Our Mission: To ensure a safe and healthy environment for students to learn, teachers to teach, and employees to work.
Our Vision: To eliminate all environmental health and safety risks at schools.*

The beneficiaries of this Project are the La Salle Elementary School (La Salle ES) students, faculty, staff, families, school supporters, and the community at large who may request access to the Campus facilities and grounds pursuant to the Civic Center act (CA Ed. Code Sections 38130-38139).

Name of Public Agency Approving the Project:

Los Angeles Unified School District

Name of Person or Agency Carrying Out Project:

Los Angeles Unified School District

Exempt Status: (check one below)

- Ministerial [Public Resources Code (PRC) Section 21080(b)(1); CEQA Guidelines Section 15268²]:
- Declared Emergency [PRC Section 21080(b)(3); CEQA Guidelines Section 15269(a)]:
- Emergency Project [PRC Section 21080(b)(4); CEQA Guidelines Section 15269(b)(c)]:
- Categorical Exemption (PRC Section 21084; CEQA Guidelines Sections 15300 -15333):
 - *CEQA Guidelines Section 15303 – New Construction or Conversion of Small Structures*
 - *CEQA Guidelines Section 15311 – Accessory Structures*
- Statutory Exemption:

Reasons why project is exempt:

Section 15303 -New Construction or Conversion of Small Structures

Class 3 consists of construction and location of limited numbers of new, small facilities or structures; installation of small new equipment and facilities in small structures; and the conversion of existing small structures from one use to another where only minor modifications are made in the exterior of the structure. The numbers of structures described in this section are the maximum allowable on any legal parcel.

The Project will install a new free-standing electronic marquee in the front of the school, along with associated concrete footing and electricity. Replacement of these facilities will not present a new or expanded use of the Campus. Therefore, the Project fulfills the requirements of CEQA Guidelines Section 15303.

Section 15311 – Accessory Structures

Class 11 consists of construction, or placement of minor structures accessory to (appurtenant to) existing commercial, industrial, or institutional facilities.

The Project will install a new free-standing electronic marquee in the front of the school, along with associated concrete footing and electricity. The Project will place a minor structure accessory to an existing institutional facility. Therefore, the Project fulfills the requirements of CEQA Guidelines Section 15311.

Section 15300.2 - Exceptions

² CEQA Guidelines can be found at California Code of Regulations Title 14, Chapter 3, Section 15000 – Section 15387.

Section 15300.2 of the CEQA Guidelines, Exceptions, provides conditions under which categorical exemptions are inapplicable. Review of the Project indicates that it will not violate any of the exceptions described below.

1. *The project would occur in certain specified sensitive environments or locations;*

The Project will be located on a fully developed campus. The Campus has not been designated as a sensitive or biological site and no sensitive or biological resources have been identified on the Campus that will be impacted by the Project.³ The Project will consist of in-kind construction to previously disturbed areas on an existing campus that is not on or within the immediate proximity of any sensitive environment. The nearest significant ecological area (SEA) consist of the Ballona Wetlands, located approximately 7 miles west of the Project site.⁴ These improvements will not require alterations, removal, destruction or any other form of impact to any sensitive or biological resources. Therefore, the Project will not have the potential to adversely impact sensitive or biological resources.

2. *Cumulative impacts would be considerable because successive projects of the same type would occur at the same place over time;*

Currently, there are no other successive projects of the same type planned at the Campus during the same construction period.⁵ All known activities that will occur on the Campus during the same construction period have been discussed in the Project description. The Project will not have the potential to result in significant impacts that will be considered cumulatively considerable. Therefore, no cumulative impacts will be expected to result from the modifications, upgrades, and improvements associated with the Project.

3. *There is a reasonable possibility that the activity would have a significant effect on the environment due to unusual circumstance;*

There are no known unusual circumstances that would have a significant effect on the environment. The Project may include minor ground-disturbing activities. These activities are not considered unusual circumstances for the classes of projects under which an exemption is claimed. Nevertheless, consideration must be given to the management of pavement removal and excavated soils associated with earthwork activities for the Project. The Project involves the removal of pavement, which requires soil sampling and testing for characterization prior to removal. Excavated soils will only be reused onsite if they are placed beneath paved areas. OEHS must be notified to provide oversight of any import or export of soils and materials to ensure that these activities are conducted in compliance with the requirements of District Specification 01 4524, relevant provisions of South Coast Air Quality Management District Rule 1466, and other applicable environmental agency rules and requirements.⁶ Furthermore, as set forth in SC-CUL-7, SC-CUL-9, SC-CUL-10, and SC-CUL-11 of the Standard Conditions of Approval for District Construction, Upgrade, and Improvements Projects as adopted by the Board of Education in February 2019,⁷ and in District protocols, construction activities must be stopped immediately and OEHS notified upon discovery of subsurface features, such as buried resources (i.e., paleontological resources, archaeological resources), tanks or seepage pits, or stained/odoriferous soils.⁸ Lastly, any construction and

⁸ *Ibid.*

demolition waste shall be recycled to the maximum extent feasible per SC-USS-1.⁹ Therefore, the Project will not have a significant effect on the environment due to unusual circumstances.

- 4. *The project may result in damage to scenic resources, including but not limited to trees, historic buildings, rock outcroppings, or similar resources within a highway officially designated as a scenic highway;*

The closest officially designated scenic highway is State Route 27 (SR 27), which is located approximately 17 miles northwest of the Campus.¹⁰ The Campus is not visible from SR 27 and the Project does not involve alterations to the Campus that would have the potential to damage scenic resources. Therefore, the Project will not be expected to result in damage to scenic resources or similar resources within a highway officially designated as a State scenic highway.

- 5. *The project is located on a site which is included on any list compiled pursuant to Section 65962.5 of the Government Code; or*

The Campus associated with the Project is not included on any list compiled pursuant to Section 65962.5 of the Government Code.¹¹ Therefore, the Project will not be expected to result in impacts related to being located on a hazardous waste site.

- 6. *The project may cause a substantial adverse change in the significance of a historic resource.*

Built in 1945, La Salle ES is over 45 years old, meeting LAUSD’s threshold for review as a potential historic resource and requiring evaluation for historic eligibility. However, LAUSD’s Historic Preservation Specialist determined that La Salle ES is ineligible as a historic resource. The Campus consists of functional buildings with no architectural features associated with a particular style. Research did not reveal any significant association between the Campus and the development of alternative educational approaches or any other historical events or personages significant to national, state, or local history. Therefore, the Project would have no impact to a historic resource.
