

## Premium Content Download Service

### 1. What is Premium Content Download Service?

Premium Content Download Service allows you to access and download premium content from third party content providers. The premium content downloads consist of ringtones, wallpapers, and screensavers delivered via MMS. Standard messaging rates always apply along with premium charges.

### 2. What does MMS stand for?

MMS stands for Multimedia Messaging Service. When you send a picture message to a friend, it is sent as a MMS message. Please note, if you send an MMS to a person without a MMS compatible handset, the message may only appear as plain text or may be rejected. MMS messages sent from Verizon Wireless handsets cannot be delivered to most international mobile phone numbers.

### 3. How do I opt-out of premium content subscription?

To opt-out of a premium content subscription you have two options:

0. Reply to the monthly subscription Text message sent by the content provider with one of these five (5) keywords: QUIT, STOP, END, CANCEL, UNSUBSCRIBE.

1. Once you send the Text message you will receive an opt-out Text message confirmation.

OR

2. Send a Text Message to the short code with the keyword STOP or STOP ALL to end the monthly subscription.

If you are unable to opt-out using the keyword, make sure the *auto signature feature* on your device is turned off when sending the Text message. If auto signature is turned on, you will need to remove the signature from the message body and resend the Text message.
