

Programming the Midland 300WR Radio to Receive NOAA All-Hazard Alerts for LA County

1. Turn the radio on, using the power/volume wheel on side of the radio (Ensure the volume is turned up so you will be able to hear the broadcast).
2. Press the “menu” button.
3. Press the up or down arrow until “weather channel” is displayed on the LCD screen.
4. Press the “select” button.
5. Press the up arrow to manually scroll to Channel 7, the frequency for Los Angeles County.
6. Press the “select” button to save this channel.
7. Press the “menu” button to exit programming mode.
8. Press the “weather/hazard on/off” button to listen to the weather radio. Use the power/volume wheel to adjust the volume to a desired listening level.
9. Press the “menu” button to open menu options.
10. Press the up arrow to scroll through menu options until “county code” is displayed.
11. Press the “select” button and then the “up” arrow to scroll through “single”, “multiple” or “all.”
12. Display “single”, then press the “select” button. “Code 01” will be displayed.
13. Press the “select” button to program this code. The first digit space will start blinking.
14. Use the up arrow to scroll through the digits 0-9. The code for LA County is 006037. Input the first digit then press the right arrow to save that selection and move to the next digit.
15. Continue programming all 6 digits in this way. When finished, press the “select” button and your entered code will be saved.
