

Public School Choice School Plan Guide for Franklin Magnet

Guiding Questions	Explanation	Rationale	Glossary of Terms
<p>Section 1: Vision of the Student</p> <ul style="list-style-type: none"> • What skills and knowledge will students gain to prepare them for the next level of learning? • What will students know and be able to do when they leave this school? 	<p>Franklin Magnet’s theme emphasizes Math, Science, and Letters. Our Science and Math focus gives students a lens to look at their studies in all subjects with a set procedure and a critical eye. The Scientific Method encourages students to use a procedure to problem-solve and test their conclusions. We see clearly how that process can be applied in all disciplines, and we want to structure our school around it (“Academic” Method).</p> <p>The following skills are embedded within the “Academic” Method:</p> <p><u>21st Century Skills:</u></p> <p>Communication: Students must know how (verbally, non-verbally, and in written form) and why (purpose) we communicate. They must also practice using those communication skills in a supportive, guiding environment before going out in to the world.</p> <p>Collaboration: Students must be able to work independently as well as with others to accomplish goals and tasks. They must also learn greater responsibility and self-motivation in order to become better group members and leaders.</p> <p>Critical Thinking: Students must be: adaptable, resourceful, inquisitive, creative, reflective, and responsible. We want students to ask questions about their learning, challenge themselves, and rise to meet the high expectations of their</p>	<p>The world is changing daily in unpredictable ways. Students need to not simply be able to regurgitate facts or memorize formulas. They must be able to analyze information and use a complete skill set to succeed in post-secondary education, have fulfilling careers, and become leaders in their communities.</p>	<p>See below:</p> <pre> graph TD A[MAKE AN OBSERVATION] --> B[ASK A QUESTION] B --> C[FORM A HYPOTHESIS] C --> D[CONDUCT AN EXPERIMENT] D --> E[ACCEPT HYPOTHESIS] D --> F[REJECT HYPOTHESIS] F --> C </pre> <p>(Image courtesy of William Harris “How the Scientific Method Works”)</p>

“Academic” Method Steps*	As practiced in English														
Make an Observation	“Hook” students in to lesson/unit														
Question	Essential Questions for unit of study														
Hypothesis	Student creates a tentative answer to essential questions (in various formative forms: writing, discussion)														
Experiment	Test the hypothesis (do activities that challenge a students’ thinking or ask students to prove why their thinking seems to be correct).														
Conclusion	<p>Student collects all necessary information (from lecture, research and class work) and analyzes that data.</p> <p>Based on data, student makes a final decision in a summative assessment about essential questions (presentation, debate, essay).</p> <p>*Students may have to return to earlier steps to make a valid conclusion.</p>														

Public School Choice School Plan Guide for Franklin Magnet

Guiding Questions	Explanation	Rationale	Glossary of Terms
<p>Section 2: Vision of the School</p> <ul style="list-style-type: none"> • What will the school feel like for students and parents at your school? • What must the school do to make sure all students are successful and prepared to be successful at the next school level and beyond? 	<p>Many of our students chose our school for its Math and Science focus. But students will, from engaging in the “Academic” Method, see connections between all subjects and will develop a mindset they will need in their futures no matter what careers they choose. We want our students to see the value in coming up with an idea, researching and testing the idea, and sharing their results. If students can master these skills, they can serve as leaders in their desired fields.</p> <p>Students will feel a sense of belonging and pride in the Franklin Magnet. Students will feel they are receiving a rigorous and meaningful education in all disciplines as they aim to meet high expectations.</p> <p>Parents will feel welcome to participate in a variety of ways including (but not limited to): observing the instructional program, engaging in decision-making, and participating in community-building activities. Parents will know their students are being challenged and well prepared for their futures.</p> <p>The school must, as it already does, prioritize the needs of students in its decision-making. The school will continue to use data to set goals for students and the program.</p>	<p>We believe high expectations, clearly stated to parents and students, make for a successful student. We also believe we are a Magnet “Family” and that students, parents, and faculty/staff should feel comfortable and supported at our school.</p>	<p>Project-Based Learning: Students are given a significant open-ended question to allow for deeper understanding of concepts. They must collaborate to come up with a product that can be shared with others. PBL teaches students the 21st century skills referenced above.</p> <p>(www.bie.org)</p> <p>Understanding by Design (UbD): A research-based framework for designing curriculum, assessments, and essential questions that drive student learning. This aligns very well with our ideas about the “Academic” Method.</p> <p>(www.ubdexchange.org)</p> <p>Kagan Strategies: These grouping and discussion strategies are used to help students become more engaged and to provide more opportunities to practice their learning in a safe environment. These strategies can help create classroom communities and improve academic success.</p> <p>(www.kaganonline.com)</p> <p>Specially Designed Academic Instruction in English (SDAIE): This approach to teaching allows English Learners better access to the core curriculum through the use of language and vocabulary specific lessons, graphic organizers, manipulatives, visuals, and other purposeful strategies.</p>

Guiding Questions	Explanation	Rationale	Glossary of Terms
	<p>Starting with 9th grade, we teach students organizational, research, problem-solving, and study skills. We introduce interdisciplinary and Project-Based Learning. We also will continue to commit to creating effective lessons (UbD) and using effective instructional strategies (Kagan Collaborative Models, PBL, SDAIE).</p> <p>Our activities, and our Magnet School, stress the importance of being involved in the school and the community. Each year, we have built and will continue to build upon those foundational experiences culminating in a successful senior year that will prepare students for their futures.</p>

	Coordinator, and the Title III Coordinator to ensure our students are receiving accommodations and modifications to meet the standards of their core academic classes.		
<p>Section 4: School Plan Priorities To Turnaround Student Performance</p> <ul style="list-style-type: none"> • What are the top three to five priorities must the school address to improve student achievement? • What is required to achieve the growth needed to get to the school of the future where all students are high achievers? • What type of academic strategies will be implemented? 	<p>Priorities to Improve Student Achievement</p> <ol style="list-style-type: none"> 1. Maintain a strong focus on instruction (particularly in those areas of need listed above, but also on maintaining and improving our areas of strength). 2. Increase institutional support—providing our students, parents, and teachers with a counselor and having a clerical position for our school. Additionally, as we increase our student numbers, we will be able to add teachers (Magnet Norms & Positions described in Bulletin 1125.6). 3. Increase interdisciplinary teaming and ensure we have time to do so effectively. 4. Improve our partnerships within our community: <ul style="list-style-type: none"> • continue working with our feeder Middle Schools, including Burbank, Berendo, and L.A. Academy • work with Franklin to make agreements for use of facilities, support staff, and courses where needed (P.E., AP courses, Art) • expand relationships with Occidental College, CalTech, Pasadena City College 5. Improve our transition program for students new to Franklin Magnet (moving from middle school to high school or otherwise). 	<ol style="list-style-type: none"> 1. We believe rigorous instruction is the key to students’ future success. We make all our decisions based on data and based on student need. 2. We believe our students need access to a counselor to help them stay on track to graduate with their A-G (college) requirements fulfilled, to help them apply for college, and to support students’ with their academic and emotional needs. A clerical position would allow students and parents more immediate access to information and staff. Increasing our student number from 340 to a 	<p>Project-Based Learning: Students are given a significant open-ended question to allow for deeper understanding of concepts. They must collaborate to come up with a product that can be shared with others. PBL teaches students the 21st century skills referenced above.</p> <p>(www.bie.org)</p> <p>Understanding by Design (UbD): A research-based framework for designing curriculum, assessments, and essential questions that drive student learning. This aligns very well with our ideas about the “Academic” Method.</p> <p>(www.ubdexchange.org)</p> <p>Kagan Strategies: These grouping and discussion strategies are used to help students become more engaged and to provide more opportunities to practice their learning in a safe environment.
