POLICY: The Los Angeles Unified School District Employees and all associated persons who work with or have contact with students are expected to follow all District policies when using social media as a form of communication. Under certain circumstances, the District has jurisdiction to discipline employees who violate rules of appropriate conduct which includes, but is not limited to, the use of social networking sites during or outside of work hours. Additionally, the District may not be able to protect or represent employees who incur legal action from a second party in response to the employee’s behavior on a social networking site.

MAJOR CHANGES: This revision replaces BUL-5688.1 of the same title, dated February 2, 2015 to reflect updated guidelines and definitions for District users while engaging in social media (Attachment A).

PURPOSE: The purpose of this updated bulletin is to provide policies and guidelines for social media communications between employees, students, parents and other associated persons; to prevent unauthorized access and other unlawful activities by District users online; to prevent unauthorized disclosure of or access to sensitive information, and to comply with the Children’s Internet Protection Act (CIPA). While the District recognizes that during non-work hours employees and students may participate in online social media, blogs, and other online tools, District employees and associated persons should keep in mind that information produced, shared and retrieved by them may be subject to District policies and is a reflection of the school community.

BACKGROUND: The use of social media for instructional purposes can help augment instruction. However, when social media postings violate the law or District policies or create a substantial disruption to the school community and/or work environment, the administrator may have an

obligation to respond and take appropriate action, including but not limited to investigation and possible discipline.

GUIDELINES: I. SOCIAL MEDIA GUIDELINES FOR EMPLOYEES AND ASSOCIATED PERSONS

Many schools, offices and departments have their own websites and social media networks that enable staff to share school/work-related information (e.g., grades, attendance records, or other pupil/personnel record information) may be shared using only District-approved, secure connections and locations and only by authorized individuals. Confidentiality and security of privileged information regarding students or personnel must be maintained always.

All existing policies and behavior guidelines that cover employee conduct on school premises and at school-related activities similarly apply to the online environment in those same venues.

1. Keep personal social network accounts separate from work related accounts. When a student or minor wishes to link to an employee's personal social networking site, redirect them to the school approved website. Accepting invitations to non-school related social networking sites from parents, students or alumni under the age of eighteen is strongly discouraged and, on a case-by-case basis, may be prohibited by the site administrator. (*Code of Conduct with Students – Distribution and Dissemination Requirement*) Office of Education Compliance.
2. Any employee or associated person engaging in inappropriate conduct including the inappropriate use of social media sites and applications during or after school hours may be subject to discipline.
3. Never post any personally identifiable student information including names, videos and photographs on any school-based, personal or professional online forum or social networking website, without the written, informed consent of the child's parent/legal guardian and the principal.
4. Never share confidential or privileged information about students or personnel (e.g., grades, attendance records, or other pupil/personnel record information).
5. Users shall have no expectation of privacy regarding their use of District property, network and/or Internet access to files, including email. The District reserves the right to monitor users'

online activities and to access, review, copy, and store or delete any electronic communication or files and/or disclose them to others as it deems necessary. [Refer to BUL- 999.12, *Responsible Use Policy (RUP) For District Computer Systems*] dated November 27, 2017.

6. Posting inappropriate threatening, harassing, racist, biased, derogatory, disparaging or bullying comments toward or about any student, employee, or associated person on any website is prohibited and may be subject to discipline.
7. Threats are taken seriously and are subject to law enforcement intervention, including but not limited to formal threat assessments. [Refer to BUL-5798.0, *Workplace Violence, Bullying and Threats (Adult-to-Adult)* dated July 16, 2012.]
8. District employees and associated persons are responsible for the information they post, share, or respond to online. Employees should utilize privacy settings to control access to personal networks, webpages, profiles, posts, digital media, forums, fan pages, etc. However, be aware that privacy settings bring a false sense of security. Anything posted on the Internet may be subject to public viewing and republication by third parties without your knowledge.
9. If you identify yourself online as a school employee or associated person, ensure that your profile and related content are consistent with how you wish to present yourself to colleagues, parents, and students. Conduct yourself online according to the same code of ethics and standards set forth in the Responsible Use Policy. It is recommended that you post a disclaimer on your social media pages stating, "The views on this page are personal and do not reflect the views of the Los Angeles Unified School District."
10. Use of District logos or images on one's personal social networking sites is prohibited. If you wish to promote a specific LAUSD activity or event, you may do so in accordance with the Office of Communications and Media Services guidelines.
11. Misrepresenting oneself by using someone else's identity may be identity theft. It is advisable to periodically check that one's identity has not been compromised.
12. During an emergency situation that impacts the employee's worksite, the employee may post a general statement of wellbeing

LOS ANGELES UNIFIED SCHOOL DISTRICT POLICY BULLETIN

to their social network account if doing so does not interfere with their assigned emergency duties.

II. EDUCATIONAL VALUE OF SOCIAL MEDIA

Technology is reshaping how we reach our students and how students interact with the world. For example, some teachers are using social media as an educational tool. Schools are using social media to launch anti-bullying campaigns, to share school news and events, to increase homework compliance and support, and to enhance classroom instruction. [Refer to <https://achieve.lausd.net/iti> for additional resources regarding social media and classroom instruction].

All social media interaction between staff and students must be for instructional purposes and must not include confidential information without parental and site administrator approval. [Refer to *BUL 6399.2, Social Media Policy for Students*, dated July 11, 2018].

The use of social media for instruction provides students the opportunity to engage in self-directed learning with differentiated paths to knowledge acquisition and processing. Students can use social media to catch up with course material as well as explore topics further. Social media also provides the opportunity for students to increase engagement with course content and to take advantage of peer learning. Using social media as an instructional tool will help augment students learning as well as help prepare them to be college and career ready.

When using social media for instructional purposes, the highest possible privacy settings must be utilized.

- The site administrator and parents must be notified of all classroom social media use.
- Additionally, the site administrator or designee shall have administrative access to the social media sites.
- If online commenting is enabled in an open site, the comments must be moderated and monitored daily for inappropriate language and content.
