Access the full remote learning kit [here!](#)

This transition to remote learning in such a short timeframe is tough, and Science Friday wants to make sure that you have access to inquiries and engineering & design challenges that you can easily assign to learners at home. Grades 3 – 12. No login required. Click [here to access](#)

Lesson of the Day: ‘Teenager, an Aspiring Detective, Returns \$135,000 He Found’

In this lesson, students will learn what decision made Jose Nuñez Romaniz a “hero in the town,” and why he initially didn’t understand why a police officer characterized him that way.

By SHANNON DOYNE

Lesson of the Day: ‘Gaps in Amazon’s Response as Virus Spreads to More Than 50 Warehouses’

In this lesson, students will learn about essential workers fighting for protective equipment and better benefits.

By NICOLE DANIELS

New York Times *Lesson of the Day* – Short lesson plans featuring current events articles. No login required. Grades 9 -12. Click [here to access](#)
