

AmplifyScience

Grades K-5

Lesson guides for Amplify Science- reading and simulation activities are available to you. (As well as the Student Investigation Notebook pages for those activities in grades 2-5.) To access these resources, refer to your respective grade and unit, then download whichever activities you would like to send home. Both English and Spanish versions of these materials are included in the lesson PDFs.

Grades 6-8

Our Amplify Science- reading and simulation activities provide excellent opportunities for students to reflect on unit content and to continue to explore concepts independently. To help make these activities doable at home, we have posted PDF articles, Investigation Notebook pages, and copymaster pages (as appropriate). Students can also access these resources digitally, if a device is available at home.
