

Virtual training is available from the [SkillSets Online](#) catalog and though most courses are technical, there are some business and end user courses that may be of interest to your staff. Business courses include: Project Management; Agile PM Essentials; Scrum Master; ITIL. We have unlimited access up to June 30, 2018.

The training is self-paced and courses can range between 20 to 25 hours in length. All courses include chapter quizzes and a test, therefore it is important that student completes it by the due date (14 days after the start date) to ensure that you will be able to pass. It's available 24/7 and can be accessed from work or home as long as the PC used for training passes the systems check.

This is the link to the catalog: <https://skillsetsonline.com/online-courses/>

If you are interested in taking a course through Skillsets Online, click 'IT Training Request' on the IT Training Academy site to complete and submit an online form.

Be sure to indicate the course #, course name and a start date.
