

## LAUSD Education Technology K-12 Voucher FACT SHEET

This Fact Sheet supplements the LAUSD Education Technology K-12 Planning Sheet. It provides high level specification tables of all items available for purchase through the California Educational Technology K-12 Voucher Program. The Fact Sheet and the Planning Sheet were created to assist schools with the ordering process. When you are ready to order, log in at <https://bes2a.lausd.net/vouchers>.

Several factors should be considered before placing your order, such as your technology equipment inventory and age, the purpose of the equipment, and other funding sources, such as the [Common Core Funding Allocation](#). If computers are to be used for student assessments, such as Amplify (DIBELS Next and TRC), LAS Links, or Scholastic Reading Inventory (SRI), please be sure to check the [computer system requirements](#).

The LAUSD Education Technology K-12 Voucher Program is not related to any other District program or project that may provide technology equipment, such as Common Core Technology Project (CCTP) and My Integrated Student Information System (MiSiS).

Please note: Prices below include delivery, setup, integration fees, and 9% tax rate. Actual prices listed in the online order form may vary based on your city's tax rate.
