

LAUSD-OFFICE OF ENVIRONMENTAL HEALTH AND SAFETY

JOB SAFETY ANALYSIS

OPERATING A HYDRAULIC JACK

General Precautions: Inspect the jack for hydraulic fluid leakage before every use. Check the seals.

Required Personal Protective Equipment (PPE)*

Work boots, safety vest and eye protection

Required Training

Operation of a hydraulic jack

*Additional training and PPE may be required depending on the scope of the activities to be performed with piece of equipment, including but not limited to eye and hand protection or electrical safety. All construction areas must be demarcated and barricaded.

TASK	HAZARDS	CONTROLS
1. General use	Muscle strain Skeletal injuries to neck and spine, as well as other parts of the body due to improper lifting or body position.	Adequate training is required before attempting to use the jack. Never attempt to lift a load that exceeds the limits of the jack. Make sure the jack is on level ground. Beware of the load shifting.
	Slips, trips and falls Crushing injuries to the feet and toes Equipment falling from jack	Always maintain a clear view of sight. Keep hands and feet away from rollers and other pinch points. Work boots are required. Pay attention and take your time. Use blocks or stands to support weight.

I have received, read and understood the contents of this JSA and have also acquired the aforementioned required training.
